

## ICS Industrial Engineering – Your Partner in IT-Consulting, Software and Systems Engineering for over 50 years.

### Supply Chain Integration

Development of customer-specific solutions or adaptation to existing systems for e.g. load carrier management, supplier management base, mobile radio data systems and infrastructure/building management.

### Mobile Applications

Implementation of stationary or mobile internet and cloud-based business processes, from mobile radio data systems in the rough production environment to needs-based smartphone or tablet apps.

### Audit & Assessment of your TISAX® Processes

Comprehensive services portfolio covering tests, audits, inspections and training. Leading you to your successful TISAX® certification.

### Industrial Security - Consulting & Processes & Implementation

The protection of data, projects and company values requires a high degree of expertise! We advise you in all matters, optimize your processes and support you during the implementation.

### Functional Safety

The availability, reliability, protection and maintainability of software and systems has been our specialty for more than 30 years.

Reliable, intelligent, secure solutions and processes in complex or security-critical IT environments are our mission. We are specialized in the fields of **Industrial Engineering** and **Mobility (Railway)** as well as cross-industry in the areas of **Functional Safety**, **Information Security** and **GDPR**.
